

Summary of previous activities and next steps in the project

Paper Prototypes

Two paper prototypes were tested in five schools in **Italy, Romania, Slovenia, Greece and the Netherlands**, engaging students aged 8 to 12 in an interactive educational experience focused on sustainability.

This has led to:

- High engagement
- Strong educational impact
- Challenge to address
- Teachers' feedback
- Age-appropriate content

Teachers in Romania

Two teachers from each partner country took part in the training event in Bucharest, held by Scoala Conil. The event was a great success and provided a valuable opportunity for teachers to exchange different points of view and share innovative learning methods. The teachers also collaborated on the creation of additional materials for lesson plans, the game, the user toolkit and built a community of like-minded educators!

What's next?

In the coming months **next steps** of Leftover Challenge will include:

- The finalisation of the educational game, which will be available on the project website;
- Multiplier Event in each partner country, involving teachers and children to disseminate the project results;
- Transnational Project Meeting in Catania, home of the Italian partner IPPOCRATE AS.
